ALTEC Metalltechnik

Product advantages

ALTEC Metalltechnik GmbH is a globally successful provider of solar mounting systems as well as a supplier in the field of metal sheet processing. With more than 20 years of experience in the metal industry and a fascination for solar energy, the company is a competent partner for solar mounting systems, customer-oriented concepts and solutions.

ALTEC does not offer one system, but complete solutions – from planning and construction through statics to customer service. This guarantees effective and professional solutions. The close cooperation with TÜV Rheinland allows for a constant product improvement and development at the highest quality level. Production takes place at the company headquarters on 8,000 m² (office and production area).

Wide product range

- ALTEC FD_COMPACT: Optimized flat roof ballast systems with 15° angle
- ALTEC SD_ON-ROOF: Pitched roof systems as on-roof installation for tiled, standing seam roof and (corrugated) eternit roofs
- ALTEC SD_TRAFIX: Short rail systems especially for trapezoidal roofs
- ALTEC FD|SD_VARIO: Elevated mounting systems for flat and pitched roofs with different angles, can be combined with many roof fasteners

Ease of installation

- Easy and fast handling from planning to mounting
- Fast, flexible installation due to pre-assembled system parts

Quality

- Use of high-quality and corrosion-resistant material
- Constant product quality through certified quality management
- Structural calculations and verification ensure maximum safety

Customer satisfaction

- Professional and punctual support for projects of all sizes
- Comprehensive service: advice, calculation, manufacturing and delivery
- 10-year manufacturer's warranty
